Arshiya Gheibi

Infrastructure, Systems & Network Administrator

Tehran, Iran • +98 919 582 3906 • gh.arshiya92@outlook.com • LinkedIn • GitHub •
Born: 28 May 2004

PROFILE

Infrastructure and network operations professional with 2+ years of hands-on responsibility across multi-client environments. Leads a three-person team supporting Cisco and MikroTik networks, Windows and Linux systems, virtualization, containerized services, and automated deployments. Combines operational ownership with an earlier software-development background.

CORE SKILLS

Networking	Cisco IOS, MikroTik RouterOS/CHR, VLANs, TCP/IP, routing, WireGuard, VPN, firewalls, DNS, DHCP
Systems & Virtualization	Windows Server, Active Directory Domain Services, Ubuntu 22.04/24.04, VMware ESXi, Proxmox VE
DevOps & Web Infrastructure	Docker, Docker Compose, Gitea, Gitea Actions, Git, Verdaccio, Nginx, Apache, Caddy, TLS/SSL
Database & SQL (earlier hands-on/academic)	SQL, MySQL, SQL Server, SQLite, relational schema design, table relationships, normalization, primary/foreign keys, indexing, Entity Framework Core migrations, application database integration
Development	PHP, JavaScript/AJAX, REST APIs, HTML/CSS/Sass, C#/ASP.NET Core, Java/Android, Python fundamentals

EXPERIENCE

Chief Technology Officer - Infrastructure & Network Operations

May 2024 - Present

Afzar Pardaz Mehrsam · Tehran, Iran

- Lead a three-person technical team and own infrastructure delivery for approximately three client companies, including an environment serving about 50 employees.
- Segment Cisco networks with VLANs for wireless, LAN, VPN, and server traffic; administer MikroTik CHR routing, firewall rules, and WireGuard remote access.
- Operate Windows Server services including Active Directory domain controllers, DNS, DHCP, and upstream DNS forwarders.
- Consolidated workloads across two VMware ESXi/Proxmox hosts and administer approximately 10 VMs, reducing additional hardware requirements and cost.
- Maintain Ubuntu VMs and five Docker containers, Gitea/Verdaccio services, reverse proxies, and TLS; automate deployments with Gitea Actions and troubleshoot runner VM failures.

SELECTED PROJECT

WordPress-Proxmox VPS Control Plugin

Approx. 2025

PHP, JavaScript/AJAX, Proxmox REST API

- Built and deployed a paid WordPress plugin that connected a VPS-hosting portal to Proxmox for approximately 10 customer accounts.
- Implemented VM status, start, stop, reboot, creation, deletion, console-access, and resource-management workflows through the Proxmox REST API.

EDUCATION & CREDENTIALS

B.Sc. in Computer Software Engineering · Islamic Azad University - North Tehran Branch — Sep 2022 - Expected Dec 2026

Linux Essentials & LPIC-1 Course Certificate · Tehran Institute of Technology (MFT) — Oct 2025

Training: Self-directed study: Network+, CCNA, MTCNA, Server+, MCSA, and virtualization

Languages: Persian (native), English (advanced)
